

Opportunity Profile Solution Architect, Payments

ABOUT OUR CLIENT

Our client is a growing, entrepreneurial financial services company providing digital banking solutions to individuals and businesses. Utilizing world-class technology, they customize payment and other financial solutions to allow the secure transferring of funds both in Canada and internationally.

THE OPPORTUNITY: Solution Architect, Payments

This is an exciting opportunity for a Fintech professional to join our client's growing team as Solution Architect, Payments. Reporting to the CTO, the Solution Architect, Payments plays a key role in realizing the vision of becoming the go-to provider for open banking and payment APIs. They are looking for a team player, someone who wants to learn and share and leverage expertise to implement innovative, secure and high-quality solutions.

This role is remote anywhere in Canada but will require occasional travel to corporate head office.

QUALIFICATIONS

- Demonstrated progressive experience working in the banking, financial services and/or payments industry an asset.
- Experience with Payments (Credit Card, Banking, Online, Offline, Visa, Mastercard, Interac), especially with ecommerce systems, retail, point of sale, pin pad/hardware, payments gateways and payment processors.
- Deep understanding of best design and software practices: design principles and patterns, unit testing, performance engineering, best practices for security, privacy, identity protection.
- Architect and design leading solutions with a strong focus on security, performance, and scalability.
- Analyze current technologies used within the company and determine ways to improve.
- Identify any product/functionality gaps required to deliver a solution and collaborate with internal product and technology teams to define the necessary enhancements to support delivery.
- Provide leadership within the team. Mentor junior members on solution related issues. Review solution design and vet solution proposals for technical viability.
- Strong understanding of .NET and SQL Server

- Provide the technical expertise to define solution design and development standards, contribute to planning the roadmap and support the alignment of the technological solution with project teams.
- Experience with architecture design concepts and techniques and the ability to communicate and evangelize those concepts to internal stakeholders and external partners.
- Leadership skills, a self starter and independent

COMPENSATION

A competitive compensation package will be provided including an attractive base salary, short term incentives and excellent benefits. Further details will be discussed in a personal interview.
